NOVELTIES - AVAILABLE TO ORDER SPRING 2019

— LONGBRIDGE NIGHTFALL, SO BRITISH

Between fantasy and reality, the new Longbridge Nightfall showcases rare materials. With a case made from the rare, precious metal palladium and a midnight blue alligator strap, it captures the blue of an intense night.

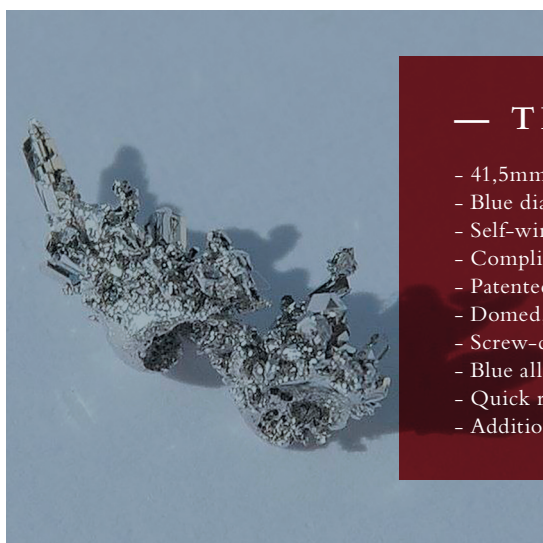

— A WORLD FILLED WITH MAGIC AWAKENS AS THE NIGHT COMES ON

This is when the new Longbridge Nightfall stands out with its rare materials. It inspires the most wondrous voyages, combining the midnight blue of an alligator strap with the silvery white of palladium, a rare metal of ever-increasing value, discovered in 1803 by a British physicist. A reflection of oneself, the Longbridge Nightfall shines with simplicity and intensity and expands into new frontiers with its 41 mm case. Embodying the English luxury and urban chic of the collection, this model possesses the fervour found between fantasy and reality.

Longbridge Nightfall
