No sport, no fun: the Sea-Timer BlackMotion

Be it on, in or by the water, when sport represents fun with a capital F, the Sea-Timer BlackMotion is totally in its element. This robust sports watch is the ideal companion for anyone who loves to be outdoors and is always on the move.

Do we only buy sun lotion in extra-large bottles, barely even notice if we get salt water in our eyes and simply grab a jetboard when the wind isn't on our side? If so, there's no doubt about it: We're a perfect match for the Sea-Timer BlackMotion!

This new Mühle sports watch is an absolute must for anyone who is always on the move and simply cannot wait to try out new fun sports activities. Its black stainless steel case reveals at a glance that the Sea-Timer BlackMotion is the ideal companion for all sports adventures. The high-quality case not only features a 2.5-millimetre-thick double anti-glare sapphire crystal but also boasts a solid screw-in crown with extra side protection.

These highlights are joined by an elaborate TiC coating, which transforms the watch from a sophisticated timepiece into a cool-looking companion for your wrist. A process known as PVD (physical vapour deposition) is used to coat the case of the watch in multiple layers of titanium carbide (TiC). This multi-layer technique provides multiple benefits, namely a surface as black as night, extremely resistant layer thicknesses and increased hardness of the stainless steel case.

The case not only looks the part but also boasts a pressure resistance of up to 30 bars and is complemented by an equally dark textile strap. The jet-black strap is made of water-resistant fibres and is also wearer-friendly on the inside thanks to a layer of comfortable and non-irritable rubber. As a watch dedicated to sport, the length of the Sea-Timer BlackMotion can be flexibly adjusted using its robust pin buckle, meaning that it can even be worn over a wetsuit on a cold day on the coast.

This combination of casual style and top functionality is additionally reflected in the face and hands. The outer area of the face, which is home to the watch's fine minute graduation and high-contrast white hour indices, features a matt black design as an ideal solution for excellent readability. This is joined by blackened nickel-plated hands, which stand out perfectly as they complete their 24-hour circuit training. The fact that the darker steel surfaces of the hands are coated in bright white luminescent material makes them shine out so that wearers can even read the time at a fleeting glance.

Of course, if the time is easy to read, it also always needs to be accurate and in the case of the Sea-Timer BlackMotion, this is guaranteed by a reliable SW 200-1 Mühle version movement. This impressive piece of equipment contains the company's patented particularly shockproof woodpecker

neck regulation and is meticulously regulated in six different positions and set to ensure accuracy values of between 0 and a maximum of +8 seconds per day. And there's more: The movement of the Sea-Timer BlackMotion is also fitted with the efficient Mühle anniversary rotor, which transforms each and every movement into valuable winding power. Just like its wearers, the Sea-Timer BlackMotion is a strong believer in the fact that sufficient exercise is the key to a fun and fulfilling life.

Technical details:

Movement: SW 200-1, automatic; Mühle version with patented woodpecker neck regulation, blue anodised anniversary rotor and characteristic Mühle surface finishes. Stop-second. Fast date correction. 38-hr power reserve.

Case: Stainless steel with a black titanium carbide (TiC) coating and a bidirectional bezel. 2.5mm-thick domed and double anti-glare sapphire crystal. Transparent case back. Screw-in crown. Ø 44.0 mm; H 12.5 mm. Water-resistant to 30 bars. Textile strap with a stainless steel pin buckle (black, DLC-coated).

Dial: Black. Blackened nickel-plated hands. Hour markers and hands coated in Super LumiNova.

About Mühle-Glashütte GmbH

Here at Nautische Instrumente Mühle-Glashütte, we enjoy being different. This is precisely why we would rather breathe fresh country air than sit in an air-conditioned office or make our way along a muddy forest track instead of gliding along a stunning cycle path. Is that also how you enjoy being different sometimes? This is precisely why we make watches designed to help you to power through the day.

In order to ensure that a Mühle watch is the ideal companion for every adventure, we send it on its way with very special qualities in the form of our three nautical values: "precision", "robustness" and "readability". Our watches' high degree of robustness is achieved by their particularly shockproof Mühle fine regulation and highly resistant cases that are water-resistant up to 10 bars or more. Easy readability is guaranteed by clear and straightforward dials that enable wearers to view the time at a glance and ultimate precision is the result of our intricate regulation, which complies with the German chronometer standard. We therefore regulate our watches so that they are always slightly fast, maintaining a precision of between 0 and a maximum of +8 seconds per day. This enables us to ensure that Mühle watch wearers are never too late because of their time measuring instruments.

Press Release 2019

Thilo Mühle places particularly high value on maintaining such high quality standards. He represents the fifth generation of the Mühle family to manage the independent family company from the German town of Glashütte. Robert Mühle laid the foundation for the development of Mühle-Glashütte in 1869, when he established a family company producing precise measuring instruments for the local clock and watch industry in Glashütte. Our company has been operating under the name of “Mühle-Glashütte GmbH nautische Instrumente und Feinmechanik” since 1994 and not only produces high-quality wristwatches but also marine time systems, marine chronometers and other nautical instruments. For our family, 2019 is therefore a year of very special celebrations, marking the 150th anniversary of the company's founding by Robert Mühle and also 25 years of the company “Nautische Instrumente Mühle-Glashütte”.
