

5 Steps To Convert Your Visual Merchandising Concepts Into Reality

To convert your visual merchandising concepts into reality, TDF Asia Ltd adopts quality control on every production step and provides the best timeline to fit your needs. We implement window and in-store props worldwide and ensure an excellent customer experience during the whole cooperation. Our cooperation process is as follows:

1. **Technical Drawing:** It is important to communicate the ideas clearly before the project gets started. To ensure we meet your visions, our team will provide TD for your approval.
2. **Prototyping:** We take all variables such as material, budget, timing and packaging into consideration during prototype development to meet your needs.
3. **Production:** We realize the visual merchandising concepts with quality control on every production step based on ISO9001 and excellent time management under our factory qualified with Sedex Members Ethical Trade Audit and ISO 14001.
4. **Packaging:** All the products are packed based on quality standards (ISTA) with drop test and vibration test. To deliver the visual merchandising globally, we also follow all labeling, shipping and packaging regulations of any destination.
5. **Global Roll-Out:** We provide full logistics and installation solutions that guarantee safe delivery of your goods from our factory to your warehouses or directly to your stores to reduce defects.

During the entire process, our project managers will follow up and update the status to our clients regularly. TDF Asia Ltd thus builds up confidence and trust with our customers through this transparent communication.
